EDUCATION

University of Information Technology (VNU - HCMC), Thu Duc, HCM city
Software Engineering

2020 - Present
GPA in 5 semesters: 8.09/10

SKILLS & LANGUAGE

Skills: JavaScript, Typescript, ReactJS, NextJS, C#, ASP.NET, SQLServer, GitHub, Postman.

Others: Research, Self-learning, Working independently and collaboratively, Ability to read and understand specialized English documents.

Language: English with TOEIC score 875 | [Certificate](#)

PERSONAL PROJECTS

VISSAN_LIS, Full Stack Web Developer | [Github](#) | [Demo](#)

Jun 5, 2024 – Present

- Developed a NextJS application management system for VISSAN's retail stores to streamline inventory reporting, order processing, and goods transfer between stores.
- Constructed a user-friendly website using Typescript and NextJS to enable users to manage inventories and orders.
- Constructed a backend using C#, ASP.NET Core Web API to establish connections between frontend and database, ensuring smooth data flow and real-times updates for users.
- Utilized SQLServer to create a database for users for seamless data management and retrieval.
- Applying docker for deployment (Firstly, deploy frontend by vercel and azure for backend).

Homelisti_Webpage, Full Stack Web Developer | [Github](#)

Oct 05, 2023 – Jan 13, 2024

- Developed a user-friendly real estate website to enable users to view property listings and contact property owners using Typescript, NextJS and MUI.
- The project provides a platform where users can browse real estate listings, view detailed information and images of properties, and directly contact the property owners for inquiries.
- Constructed a backend using C#, ASP.NET Core Web API to establish connections between frontend and database, ensuring smooth data flow and real-times updates for users.

Homlisti, Frontend Mobile Developer | [Github](#)

Apr 17, 2023 – Jun 20, 2023

- A mobile application that allows users to view real estate information, contact details, and enables users to post real estate listings.
- Developed a user-friendly real estate mobile app to enable users to view property listings and contact property owners using Javascript, ReactNative and MUI.
- Testing API with Postman.

ACCOMPLISHMENTS

- **Meta – Working with data** (coursera.org/share/0a814d87af8a17e08e929cea38e4c022): Learn about REST APIs, which are an approach for establishing communication between applications and web service.
